DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art disclose some claimed limitations. For example, Chen et al. (US 2004/0201403) discloses a method and device for dynamically calibrating frequency including RC oscillator, a counter. Pigott et al. (US 2003/0112906) disclose a system and method for providing a calibrated timing in a remote device to timing in a source device.

For claim 1, the prior art does not teach singularly or in combination a modifier for generating a modified signal, the modified signal is not received by the processor, the processor will calculate the number of variation of the potential of the base wave so as to generate a count value, and once the count value is the same as the match value, the potential of the wave is changed, moreover, when the processor receives the modified signal, the processor will keep altering the match value until the modified signal disappear and store the updated match value into the storage.

For claim 9, the prior art does not teach singularly or in combination the steps of:

(a) checking whether a modified signal is received, if yes, performing step (b);
otherwise, performing step (f);

- (b) changing the match value and generating a wave for carrying a control instruction according to the changed match value;
- (c) delaying a period of time;
- (d) checking whether the modified signal is released, if yes, performing step (e); otherwise performing the step (b);
- (e) storing the match value into the storage;
- (f) loading the match value from the storage;
- (g) calculating the number of variation of the potential so as to generate a count value;
- (h) checking whether the count value is equal to the match value, if yes, performing step (i); otherwise, performing the step (g);
- (i) changing the potential of a wave, and resetting the count value and then performing the step (g).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
